

TECHNICAL BULLETIN

R, RS, RT/RTE™ 46K Capacity

SUBJECT: 46K Heavy-Duty Beam Option

LIT NO: SEU-0218

DATE: December 2004 **REVISION:** A

IMPORTANT NOTICE

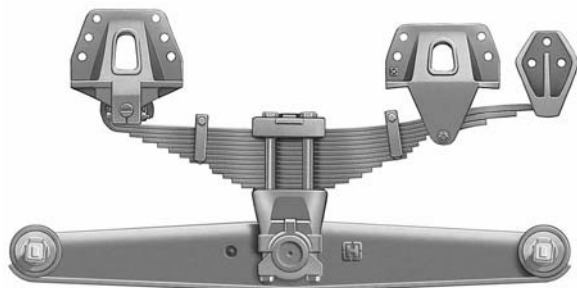

46,000 LBS HEAVY-DUTY EQUALIZING BEAM OPTION

Hendrickson is adding a Heavy-Duty Beam Option to R, RS, RT, and RTE series suspensions for use in the 46,000 lbs. capacity with 52" and 54" axle spacing. This option will include a forged or cast equalizer beam instead of the standard fabricated beam. The following severe applications have continued to demand the original Hendrickson heavy-duty equalizer beam:

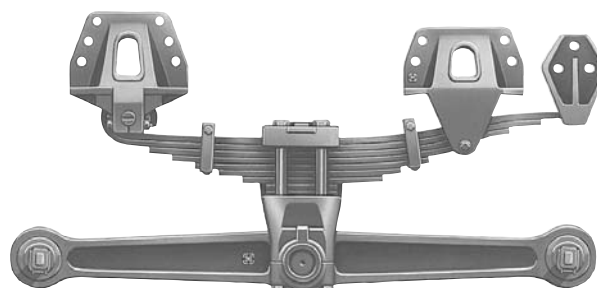

- Coal hauling
- Oil field service
- Canadian logging

Hendrickson recommends the use of the Heavy-Duty Beam for new truck orders as well as aftermarket service parts for those customers in the aforementioned applications. Other customers looking for a heavy-duty equalizing beam will also be able to order a truck with the Heavy-Duty Beam Option.

Contact Hendrickson or any authorized OEM dealer for additional details on the Heavy-Duty Beam Option for the R, RS, RT, RTE-463 series suspension.

RTE Series with fabricated beam

RTE Series with heavy-duty beam
