

HENDRICKSON TRLAXLE® — TRAILER AXLES

**For optimum performance, reduced maintenance and increased savings,
specify Hendrickson TRLAXLE® Trailer Axles**

Hendrickson continues to define the standard for trailer suspensions, axles and components by working closely with fleet and trailer manufacturers to create products that offer versatility in application, reliability and significant costs savings.

Hendrickson offers a full line of industry-standard and low-maintenance trailer axles to fit a variety of configurations. Options include both straight and bent tube designs, and various spindle configurations, capacities and track lengths — all designed and manufactured to the highest Hendrickson standards.

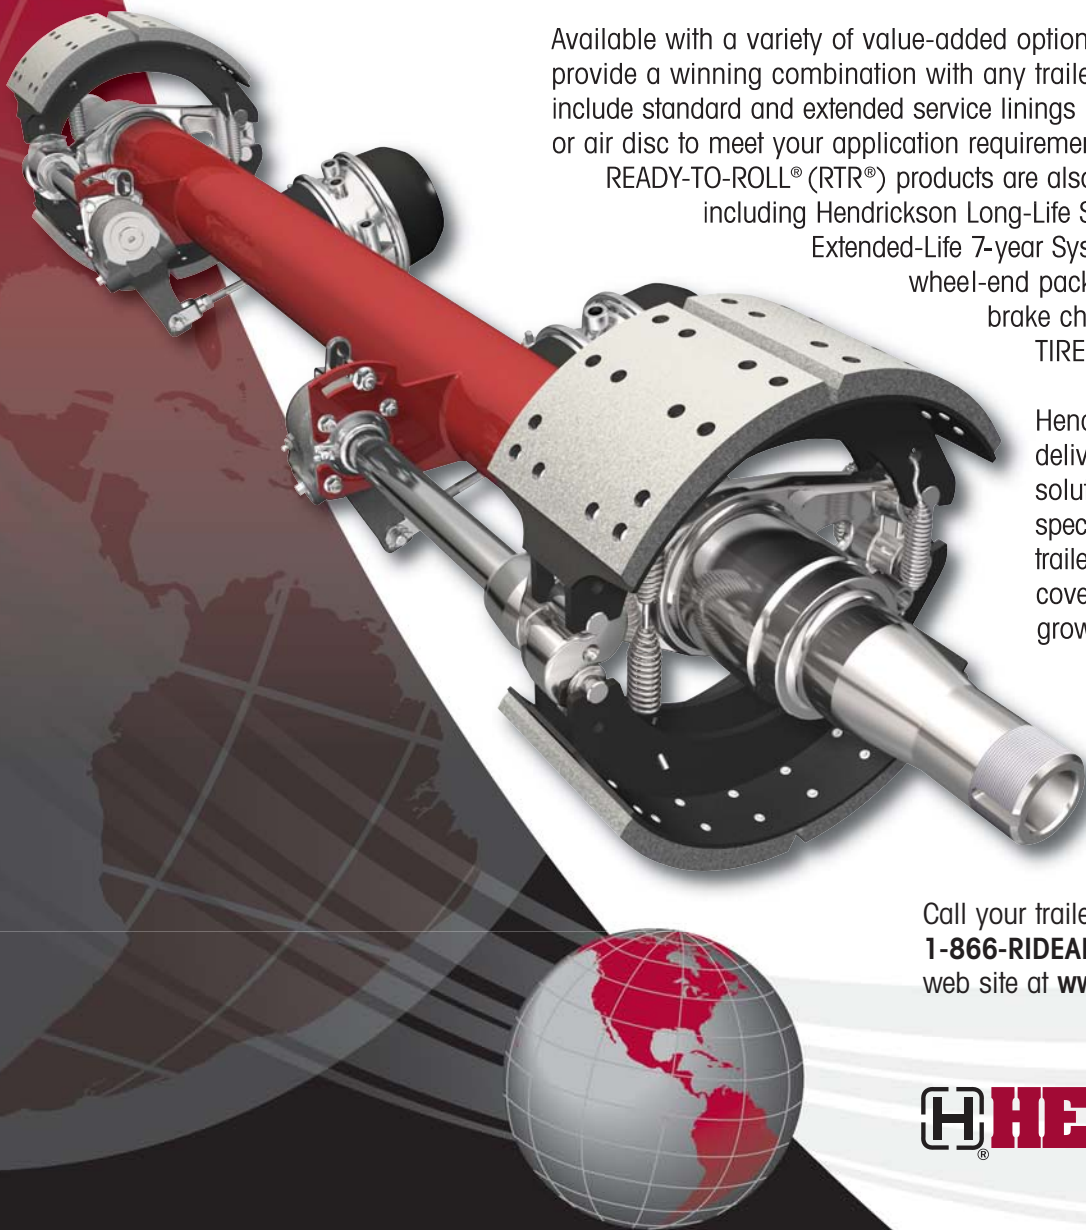

Available with a variety of value-added options, Hendrickson trailer axles provide a winning combination with any trailer suspension. Brake options include standard and extended service linings in a variety of drum brake sizes or air disc to meet your application requirements. Many of Hendrickson's READY-TO-ROLL® (RTR®) products are also available on our trailer axles, including Hendrickson Long-Life System™ (HLS®) and Hendrickson Extended-Life 7-year System™ (HXL7®) low-maintenance wheel-end packages, automatic brake adjusters, brake chambers and Hendrickson's TIREMAAX® tire inflation systems.

Hendrickson TRLAXLE trailer axles deliver a low-cost, low-maintenance solution for your trailer needs. When specifying a Hendrickson TRLAXLE trailer axle, you get the warranty coverage and support you have grown to trust from Hendrickson.

Call your trailer dealer or Hendrickson at **1-866-RIDEAIR (743-3247)** or visit our web site at www.hendrickson-intl.com.

 HENDRICKSON
The World Rides On Us®

A cost-effective answer to your trailer axle needs

In addition to our integrated axle and suspension products such as INTRAAX® and VANTRAAX® that dominate the NAFTA market, Hendrickson offers a full-line of non-integrated TRLAXLE® trailer axles for the global commercial and industrial markets.

Available in numerous spindle types, capacities and axle tracks, straight and bent tube designs, drum or air disc brakes, 12¼- to 18-inch brakes and many READY-TO-ROLL® (RTR®) wheel end, slack adjuster and brake chamber options — we have an axle to fit your air suspension or mechanical spring trailer application.

By combining Hendrickson TRLAXLE Trailer Axles with HT™ Series air suspensions, Hendrickson offers the widest variety of suspension/axle combinations in the industry.

TRLAXLE Features and Benefits

Axle Features:

- Straight or bent tubes
- Axle capacities from 10,000 to 65,000 pounds
- Available in ½-inch nominal wall to solid bar options depending on your capacity requirements
- HN™ and HP™ spindles as well as R, K and A specialty spindle types
- Friction-welded, press-up or solid spindle connections, depending on your application
- Patented axle filter protects the wheel ends from contamination
