

HT™300 Trailer Air Suspensions

Proven performance. Proven reliability. The HT™300 air suspension delivers rugged dependability and outstanding roll stability ensuring confidence and profitability in a wide range of applications.

The HT™300 is the suspension of choice for many of the tough applications around the world including, tankers, vans, logging, road trains and dump applications. The HT300 is designed for those on / off highway applications where the roads are rough and the going tough, where the operator is depending on an outstanding ride quality to protect the cargo and the trailer. The operation of the patented TRI-FUNCTIONAL® Bushing in unison with a rigid beam and solid axle connection, provides a tuned system resulting in the ideal combination of ride softness and roll stability. When combined with the UBL the total system provides outstanding productivity and profitability.
