## HLM-2 SERIES Lifiable Pusher or Tag Suspension

### HLM with HAS™230 or PRIMAAX® - a top combination

Hendrickson HLM liftable suspension provides an economical load sharing suspension system when matched with the Hendrickson HAS™230 or PRIMAAX® drive-axle suspensions.

Installed with an auto raise / lower air valve, the lift axle will raise or lower automatically when a predetermined load is put on or taken off the vehicle. This all happens without the drivers' involvement.

The HLM offers a great opportunity to increase tyre life and reduce maintenance costs, it is also lightweight without compromising durability. With up to 150 mm of axle lift, the tyres have ample clearance when raised.

The HLM is designed for installation of the 125 mm round axle and can be coupled with a drop axle for pusher location or straight axle for the tag application.

### Features

- Lifiable up to 150 mm
- Helps extend replacement and service intervals for tyres
- Allows more payload capacity
- Includes Hendrickson patented TRI-FUNCTIONAL bushings
- Easy axle alignment with QUIK-ALIGN® (no welding required)
- Axle rating up to 10 tonne
- Available as a pusher or tag axle configuration

*Actual product performance may vary depending upon vehicle configuration, operation, service and other factors.*
